

# Design & make the future of infrastructure with Autodesk

5 Reasons why Autodesk is the future-proof partner for your engineering firm

At Autodesk, being a trusted partner and helping our [infrastructure](#) customers achieve their desired business outcomes is our top priority. Our continued investment in our open platform of solutions, interoperability with third-party integrations, and focus on partnering with customers and the industry helps your engineering firm stay ahead of the curve.

## 5 REASONS why Autodesk is your partner for now and into the future:

### Continuity of solutions

Autodesk is dedicated to ensuring seamless continuity throughout our [platform](#) of solutions. From the ongoing enhancements of our essential desk tools, core for everyday users, to our progress toward a fully connected cloud-based platform, your firm can start in Autodesk and stay in Autodesk with the reliability and consistency you can trust from plan to handover.

### Capabilities for any project type

Autodesk offers a wide range of innovative [capabilities](#) from complex modeling and construction management tools, including design authoring, model coordination, cloud-based collaboration, reality capture, analysis, document management, a connected common data environment, field collaboration, visualization, and so much more.

### Collaboration with an industry-leading partner ecosystem

Autodesk is [committed](#) to building open, integrated, interoperable, and cloud-powered solutions for our customers, allowing better-informed decision-making during the project lifecycle by unlocking data and connecting project teams. We achieve this with third-party integrations that deliver infrastructure-specific workflow solutions to complement Autodesk products and through our network of strategic partners, including GIS leader [Esri](#) and [ORIS](#) materials intelligence software.

### Customer-centric approach

Autodesk develops and evaluates the prioritization of our product roadmap based on user feedback from forums, beta testing, and industry demands. With an understanding of the importance of the total cost of ownership, we offer a variety of [flexible subscription models](#) to meet the current needs of your firm. And our network of experts is here to support your implementation and day-to-day activities.

### Connection to your future hires

As the talent pipeline continues to narrow, Autodesk cultivates [partnerships with universities](#). We are committed to inspiring and empowering students with tools and skills that make for a seamless transition into the workforce, reducing upskilling time and improving overall project efficiency.

Together, we can [Design & Make](#) the infrastructure of tomorrow.
